Vishakapatnam, Andhra Pradesh

Profile Summary

Frontend Developer with 3 years of experience in building responsive, scalable, and user-friendly web applications using Angular, React, TypeScript, JavaScript, and modern UI frameworks. Skilled in translating business requirements and UI/UX designs into high-performance frontend solutions with a strong focus on usability, responsiveness, accessibility, and clean component architecture. Hands-on experience with backend technologies such as Node.js and MySQL, along with strong collaboration in Agile environments to deliver end-to-end product features efficiently.

Skills

Front end: Frontend: HTML5, CSS3, SASS, JavaScript, TypeScript, Angular, React, Next.js

UI Frameworks: Bootstrap, Tailwind CSS, PrimeNG, Material UI, ShadCN UI

Backend: Node.js, Express.js, MySQL, REST APIs, CRUD Operations, API Integration

Tools: Git, GitHub, GitHub Copilot, Jira, Postman, VS Code

UI/UX Tools and Practices : Figma, Adobe XD, Pencil, Balsamiq, Lambda Testing, Wireframing, Prototyping, User Interface Design, Responsive Web Design, A/B Testing, Micro-interactions, color-theory, Usability Testing.

Experience

Junior Software Engineer | Amzur Technologies Private Limited

June, 2023 - Present, Visakhapatnam

- Developed responsive enterprise web interfaces, improving usability and consistency across desktop and tablet devices.
- Built reusable UI components and responsive layouts using Angular, TypeScript, Bootstrap, Tailwind CSS, and PrimeNG.
- Collaborated with Business Analysts, QA, and developers in Agile sprints to ensure smooth implementation and timely delivery.
- Contributed to the migration of legacy applications from Angular v9 to v19, improving performance and maintainability.
- Applied WCAG accessibility principles to improve readability, navigation, and inclusive user experience across interfaces.
- Applied AI-assisted development workflows to accelerate coding, iteration, and project delivery.
- Supported frontend implementation with attention to accessibility, micro-interactions, and visual consistency.

Projects

Genesis CRM & Pilot System (GPS)

Frontend Developer | Enterprise CRM Application

- Developed and maintained responsive UI modules for a real estate-focused CRM application in an Agile environment.
- Converted business requirements and workflows into scalable frontend screens and reusable UI components.
- Collaborated with Business Analysts, QA, and developers to ensure smooth feature implementation and sprint delivery.
- Contributed to the migration and modernization of the application from Angular v9 to v19, improving performance and maintainability.

QASTRA

Frontend Developer | Test Automation Product

- Refactored and modernized the existing UI of a test automation product, improving visual consistency, usability, and maintainability.
- Implemented a new frontend interface on top of the existing codebase, aligning the application with modern UI/UX and component-based development practices.
- Enhanced screen structure, responsiveness, and interaction behavior to deliver a cleaner and more user-friendly product experience.
- Applied frontend best practices including reusable components, scalable styling, cleaner code structure, and improved implementation patterns.

Projects

Revup

Frontend Developer | Lead Management Web Application

- Built and enhanced frontend interfaces for a lead management platform focused on productivity and communication workflows.
- Implemented multi-user login flows and integrated Google Calendar and Gmail APIs for scheduling and email-related functionality.
- Developed responsive and modern UI components using React, ShadCN UI, and Material UI.
- Applied AI-assisted development workflows to accelerate feature implementation and improve delivery speed.

F2MX

UI Developer | Fantasy Sports Trading Platform

- Designed and implemented frontend workflows for a fantasy sports trading platform with mobile-first interaction patterns.
- Built user-facing and admin-oriented interface structures for role-based product functionality.
- Focused on responsive UI behavior, feature usability, and efficient interaction design for a data-driven product experience.
- Used rapid development and AI-assisted workflows to support faster implementation under tight timelines.

Education

Vignan Institute of Information Technology

August 2020 - May 2023 , Visakhapatnam

Bachelor of Technology in Electronics and Communication Engineering , CGPA : 8.6

Sanketika Polytechnic College

July 2017 - April 2020 , Visakhapatnam

Diploma in Electronics and Communication Engineering , Percentage : 90%

Key Achievements

Star Performer | Jan – Mar 2024

Recognized for exceptional performance and valuable contribution to product design and delivery.

Hackathon – ERP Revenue Leakage Analysis

Collaborated on a solution-focused initiative to identify revenue leakage gaps and workflow inefficiencies in ERP systems.

Accelerated Project Delivery Using AI Tools

Applied AI-assisted workflows to accelerate project execution, improve iteration speed, and meet demanding timelines.
