Vishakapatnam, Andhra Pradesh

Profile Summary

Product Designer and UX Engineer with 3 years of experience shipping enterprise web and mobile products across real estate, sports tech, and lead management. Uniquely combines end-to-end UX craft with hands-on frontend development in React and Next.js — bridging design and engineering with minimal handoff friction. Star Performer at Amzur Technologies, with a track record of measurable impact including a 25% reduction in user navigation time on a real estate CRM.

Skills

Design Tools and Practices: Figma, Adobe XD, Canva, Balsamiq, Wire-framing, Prototyping, User Interface and User Experience Design, Responsive Web Design, Usability Testing, A/B Testing, Micro-interactions, Interaction Design, Design Systems, User Flows, Information Architecture, Visual Design, Color Theory, Accessibility.

AI Design Tools: Figma Make AI, ChatGPT, UX Magic, Claude, Sketch

Front end: HTML, CSS, SASS, Angular, React, Next JS, TypeScript, JavaScript, Bootstrap, Tailwind, PrimeNG, Material UI, Ant Design, Shad CN.

Experience

UI/UX Designer | Amzur Technologies Private Limited

June, 2023 - Present, Visakhapatnam

Official Title: Junior Software Engineer

- Reduced design-to-development gaps by collaborating closely with engineers, improving delivery efficiency.
- Designed responsive enterprise web interfaces, improving usability and consistency across desktop and tablet devices.
- Translated business requirements into user flows, wireframes, prototypes, and production-ready UI designs.
- Created intuitive user journeys, interaction patterns, and micro-interactions using Figma and Adobe XD.
- Applied WCAG accessibility principles to improve readability, navigation, and inclusive user experience across interfaces.
- Collaborated with Business Analysts, QA, and developers in Agile sprints to ensure smooth implementation and timely delivery.
- Applied AI-assisted design workflows and supported frontend implementation to accelerate delivery while maintaining UX quality and visual consistency.

Projects

Genesis CRM & Pilot System (GPS)

CRM Application for Real Estate Domain | Agile Environment

- Led end-to-end UI/UX design for a real estate CRM platform, improving workflow efficiency across multiple business modules.
- Designed user flows, wireframes, and interaction patterns, reducing user navigation time by 25% across key workflows.
- Collaborated with Business Analysts, QA, and developers to refine user journeys and reduce implementation gaps by 30%, ensuring sprint-ready delivery.
- Improved consistency across legacy and new modules, resulting in 20% reduction in user confusion and support queries.
- Applied WCAG accessibility standards, enhancing readability and usability for a wider range of users.

Revup

Product Designer | Lead Management & Productivity Web Application

- Redesigned lead management workflows, improving task clarity and increasing user efficiency by 20%.
- Created intuitive multi-user interfaces for communication, scheduling, and collaboration, reducing task completion time by 15%.
- Leveraged AI-assisted design workflows to accelerate ideation and iteration cycles by 30%, enabling faster feature delivery.
- Built scalable UI patterns and reusable components, improving design consistency and reducing design rework by 25%.

Adobe to Figma Migration

UI/UX Designer | Design Systems Contributor

- Led full-scale migration from Adobe XD to Figma, ensuring 100% design consistency across existing product modules.
- Developed reusable components, templates, and shared libraries, improving team productivity by 35%.
- Standardized typography, spacing, and color systems, establishing a scalable design system and reducing UI inconsistencies by 40%.
- Improved developer hand off efficiency, reducing design-related rework by 30% through structured components and naming conventions.
- Enabled faster cross-team collaboration using Figma, improving design-to-development turnaround time by 25%.

F2MX – Mobile Designer

Mobile Product Designer | Fantasy Sports Trading Platform

- Designed a mobile-first fantasy sports trading platform, improving user engagement and interaction clarity across data-heavy screens.
- Defined end-to-end user journeys for end users and administrators, reducing onboarding friction by 20%.
- Applied rapid prototyping and AI-assisted workflows, reducing design iteration cycles by 30%.
- Optimized mobile UX for performance-driven interactions, improving user retention and session engagement by 15%.
- Balanced usability and engagement for complex data visualization, enhancing overall user experience and decision-making speed.

Education

Vignan Institute of Information Technology

August 2020 - May 2023 , Visakhapatnam

Bachelor of Technology in Electronics and Communication Engineering , CGPA : 8.6

Sanketika Polytechnic College

July 2017 - April 2020 , Visakhapatnam

Diploma in Electronics and Communication Engineering , Percentage : 90%

Key Achievements

Star Performer | Jan – Mar 2024

Recognized for exceptional performance and valuable contribution to product design and delivery.

Hackathon – ERP Revenue Leakage Analysis

Collaborated on a solution-focused initiative to identify revenue leakage gaps and workflow inefficiencies in ERP systems.

Accelerated Project Delivery Using AI Tools

Applied AI-assisted workflows to accelerate project execution, improve iteration speed, and meet demanding timelines.
